The German company PrehKeyTec is showing trendsetting technologies together with its Spanish partners: Qualica-RD (Paythunder).

PrehKeyTec is a leading manufacturer of high-quality data input systems. Products include modular keyboards, which are particularly suitable for professional use due to their high level flexibility and extreme reliability, as well as multifunctional reading devices. PrehKeyTec GmbH has many years of experience in design and manufacturing, and operates from its own manufacturing plant in Mellrichstadt, Northern Bavaria, offering true "Made in Germany" solutions.
Qualica-RD is a young technological company belonging to the same Group of Paythunder developing its own technologies as well as its artificial intelligence modules which apply in its virtual assistants, holograms and robots or payments by ultrasound among other things. They are specialists in automatic identification systems (best startup of Andalucía in 2013), payments (fintech company of Europe 2017) and blockchain and they are part of the Alastria consortium.

Francisco Javier Gómez, co-founder of Qualica-RD & Paythunder, is coordinator of innovation and talent of Alastria in MADRID, supporting other companies in the use of blockchain.

Caroline Botella from PrehKeyTec and Francisco Gómez Gómez from Qualica-RD will be showing together a new solution for fast tracking in Access Control with Artificial intelligence. First of all PrehKeyTec's reliable document scanner the PKT 4000 reads a passport, visa or another ID document. After that the visitor is individually greeted by PayThunder's hologram, personalizing interactions in a friendly and easy to follow way. Last but not least Qualica-RD's printer creates a customized MIFARE card, using the information from the scan. This new concept will not only be shown at PrehKeyTec's booth (Riviera H 039). It will also be shown in a presentation on the innovation stage on 28th of November, at 15:40.
Furthermore PrehKeyTec's booth is focusing on fingerprint solutions.

Biometric identification reduces fraud and costs associated with forgotten passwords. PrehKeyTec is offering all-in-one devices that save space and make it easier to trace transactions. One demo station will be showing the implementation of a two factor authentication. The second demo station will present the android compatibility of the company's products. A practical process will illustrate easy to use age verification solutions.
PrehKeyTec invites you to visit their booth "Riviera H 039" at this year's Trustech in Cannes. You can find out more about PrehKeyTec, PayThunder and Qualica-RD at: prehkeytec.com, qualicard.eu and paythunder.com.
